Product Data Sheet

ANTIFREEZE COOLANT 30%

Description

BENZOL® Antifreeze Coolant 30% is a premium quality ethylene glycol-based radiator coolant which is free from amines, borates, silicates and phosphates. It is easily miscible with water and possesses excellent hard water stability. It has good chemical stability and protects non-metallic components of engine radiator, like gaskets and hoses. It exhibits high boiling point and low freezing point to take care of summer and winter.

Applications

BENZOL® Antifreeze Coolant is recommended for use in mobile and stationary automotive engines having closed loop coolant circulation systems and advised to use one part of the concentrated fluid with two parts of water (preferably Demineralized Water) in the engine radiator or as per the recommendation of OEM.

Performance Benefits

- Extended life by synergistic combination
- Improved heat transfer leaves more flexibility to engine design
- Reliability depletion free and stable inhibitor
- Improved hard water stability absence of silicates and phosphates
- Save time and money maintenance-free coolant
- Environmentally friendly by using carboxylic additives
