Product Data Sheet

MOTOR ENGINE FLUSH

Description

BENZOL® Motor Engine Flush is a solvent free, engine cleaning formulation that removes engine deposits, sludge and contaminants with the oil service drain. It contains added zinc for engine wear protection. The solvent free formulation protects gaskets and seals from damage during the cleaning process. It cleans all deposits and reduce/remove sludge deposits in the whole oil system. Benzol Engine Flush cleans and protects the whole system.

Applications

BENZOL® Motor Engine Flush is designed for use in all engine types in passenger cars, light & heavy-duty commercial vehicles, motorcycles, farming, mining, agricultural, industrial equipment, marine and stationary engines

Directions

Once the flushing oil has been filled into the engine system it should be circulated for only short time (10-15 Minutes) under light or no-load conditions. This is done while the engine is in idling so that there is less stress on the engine while the cleaning action occurs. At the end, please make it sure that oil is completely drained while it is still hot.

Performance Benefits

- Contains Zinc for added wear protection.
- Solvent free to prevent engine seal damage.
- Removes engine sludge, varnish, and deposits with oil drain.
- Suitable for all Petrol, Diesel & LPG engines.
- Suitable for use with Mineral, Semi Synthetic or Synthetic Oils.
- Safe with DPF's and catalytic converters.
